

Founder | AI-Native Builder | Startups, Products & Ecosystems

Founders Inc. Artifact Alum (SF) · 4× AI Hackathon Winner · OpenAI Codex Hackathon 2nd place · Mistral × Legora Finalist · Ex-Solana - Ex-Ledger.

Selected AI & technical projects

ErwanOS | Personal agentic software development workflows

Independent Project | 2026 - Present

- Designed a versioned agentic development system connecting Codex, GitHub, Linear and Figma through reusable skills, structured specifications and persistent project knowledge
- Developing workflows for context recovery, agent orchestration, human approvals and evaluations to help AI agents resume work across sessions and projects, preserve key decisions and reduce duplicated work

Burning Man | Operations & FAQ support for a 100-person camp

Burning Man | 2026

- Built a Google Workspace-based operations system integrating Apps Script, Sheets, Forms and custom dashboards to manage registrations, membership, payments and camp logistics
- Deployed an AI-powered FAQ with source-grounded answers, Telegram integrations, unanswered-question tracking and administrative tools
- Added interaction logging, usage dashboards and evaluation tools to identify knowledge gaps and assess answer quality

PoCodex - Gamified Sales & Networking

OpenAI Codex × Mollie Hackathon | June 2026 | 2nd place

- Built and demonstrated a Pokémon-inspired networking application in one day
- Combined Pokémon-style battles with AI-enriched contact profiles and automated sales follow-ups to make QR-code contact exchanges more engaging

Professional experience

Briques.ai | Founder

Paris, France | May 2026 - Present

- Help SMEs turn operational bottlenecks into AI workflows, mapping existing processes and building automations that combine software, AI agents and human decisions
- **BSF 2.0:** Building an AI-assisted operating system for a family-owned sawmill, connecting commercial and administrative workflows, company knowledge, existing software and AI agents, with human oversight

Cliccc | Founder & Product Builder

France / San Francisco | 2025-2026

- Founded Cliccc and independently built its first iterations, evolving a Telegram bot into a mobile networking app for capturing, enriching and following up on business connections
- Led product design and integrations before expanding the founding team
- Selected for **Founders Inc.'s Artifact program in San Francisco**, January-February 2026. Supported fellow founders with product, storytelling, content strategy and design

Ledger | Lead Ecosystem Partnerships

December 2024 - December 2025

- Managed strategic partnerships with Web3 startups and technology companies, exploring hardware integrations, product collaborations and ecosystem opportunities
- Led the partner and token-gating strategy for the Solana Edition, coordinating partner selection, product positioning and cross-functional teams through launch
- Led Ledger's first airdrop campaigns, from strategy to execution. Worked with international teams on Ledger regional partnerships and ecosystem development

- Helped establish Solana's French ecosystem, supporting early-stage founders with product development, technical integrations, strategic partnerships and grant opportunities
- Contributed to events, hackathons, technical workshops and developer initiatives, helping grow the community from zero to thousands of followers

Earlier Experience | 2021-2025

Browse Club, Founder; Mozoo/M3LAB, Senior Creative Strategist; DAOZ, Co-founder and Strategy & GTM Advisor; Arianee/Aria Labs, Head of Growth; Jericho, Contributor & Mentor; BlackPool/Stake Capital, Investment & Strategy; CoinTribune/Cryptoast, Contributing Writer.

Additional AI projects**Wireframe | Interactive 3D for AI Creative Production**

Generathon · August 2026

Prototyped a Three.js interface giving users control over composition and camera angles before AI generation. Developed the concept into a model-agnostic creative production system for CPG brands, combining product and compliance knowledge, AI agents and reusable workflows

Sibelle | Personalized AI companion for dietary restrictions

Independent project · 2026-Present

Built a food companion inspired by my sister's experience with SIBO, helping users assess products, ingredients and restaurant menus against individual dietary restrictions and preferences. Currently testing privately

Glue | Multimodal AI companion across devices

Independent AI & hardware project · October 2026

Exploring a companion that preserves conversation and task context across physical environments. Preparing the software architecture and device interactions for a hardware prototype planned for an upcoming hackathon

Hackathons & recognition**4× AI Hackathon Winner****Anthropic × Lovable:** 1st Place - Slush, Helsinki | 2025**ElevenLabs:** 1st Place, Paris | March 2026**Anthropic × Sillage × Gamma:** 1st Place - Gamma Track, Paris | July 2026**Cursor × Supabase - Generathon:** 1st Place - Technology Track, Paris | August 2026**OpenAI Codex × Mollie:** 2nd Place - Paris | June 2026**Mistral × Legora × Stanford Law:** Finalist - LLM × Law Hackathon, Paris | October 2026**Founders Inc.:** Artifact Program - San Francisco | January-February 2026**Education & legal background****ESCP Business School** - MSc, International Business Law & Management | 2020-2021Research thesis: *Non-fungible tokens and decentralised finance, towards a banking revolution***Université de Limoges** - Master 2, International & European Criminal Law | 2018-2019Research thesis: *The Euribor Trials: Financial Index Manipulation through the Lens of UK and EU Law*

Legal Studies: Six years of legal education, including Université de Bordeaux and Université de Rennes

Internship: **Orrick - Paris & Milan: Technology Companies Group** (VC/PE) and Finance | 2019-2020**Skills & languages****Applied AI & Development:** AI-assisted development, agentic SDLC, agent orchestration, context recovery, reusable skills, MCP/API integrations, evaluation workflows, human approvals and observability.**Product & Technical Delivery:** Product discovery, AI use-case identification, workflow mapping, rapid prototyping, business automation and cross-functional delivery.**Startups & Ecosystems:** Ecosystem development, strategic partnerships, startup advisory, founder support, product positioning, go-to-market strategy and launch coordination.**Tools & Platforms:** GitHub, Linear, Figma, Google Apps Script, APIs, Supabase, Cloudflare, Vercel, VPS**Design & Communication:** : Design, **Taste**, writing, public-speaking, teaching and making technical concepts accessible.**Languages:** French (native), English (full professional proficiency)
